

MASK UP!

Help Reduce the Risk of Transmission!

Virginia Governor Ralph Northam has announced that, starting Friday, May 29, wearing masks will be required for everyone in the state inside all brick and mortar retail establishments; inside all personal care and grooming establishments; inside places where people congregate; inside food and beverage establishments, except when eating; on public transportation; at entertainment and recreation businesses; and when accessing state or local government services.

The only exceptions are for those younger than 10 years old; while eating or drinking; while exercising; if you have trouble breathing, or are unable to remove your mask without help; or if your health conditions prohibit wearing a face covering.

Enforcing these requirements will be the duty of the Virginia Department of Health. Any questions should be directed to 1-855-949-8378.
